## Town of Boothbay Paper Records

In the late 1980s, the town requested that we copy for them and the society some of the deteriorating old vital records, so they would be more manageable and accessible. The town consented to our continuing the process and copying other records of interest. We now have three feet of photocopied town records, including some vital records; town meeting proceedings; bills, mortgages, and deeds; and tax records. The tax and valuation records are most valuable in determining residency and lifestyle of the residents since the real and personal estates are listed.

## Town of Boothbay Microfiche

The town of Boothbay microfiched many of their records in 1972. We obtained copies of their microfiche in 1987 with a Maine State Library grant. The same year the society copied more of the town's records onto microfiche. The total is a half foot of microfiche cards. Each card holds about thirty-five images which works out to seventy pages a card.
